

We're pushing the limits of technology **to solve complex mission problems.**

About Us

Since our founding in 2007, Niyam has developed an impressive record of successful outcomes, earning our status as the go-to provider of innovative IT solutions.

Today, Niyam sits at the vanguard of the IT industry, delivering state-of-the-art, mission-critical technologies to federal agencies and the public marketplace.

We specialize in designing and deploying solutions tailored to meet the demands of five major domains: Emergency Preparedness & Response, Natural Resource Management, Law Enforcement & Justice, Public Health, and Global Citizen Services. Our solutions are proven to accelerate collaboration, increase efficiency, and consistently provide rapid, breakthrough results – all while remaining conscious of shifting timelines and budgets.

Our mission is to serve the global community by delivering innovative IT solutions for tomorrow's most complex and critical mission challenges.

At Niyam, we pride ourselves on our commitment to lasting relationships. We push the limits of technology to achieve breakthrough results for every client, anticipating their needs today to ensure they have the right solutions for tomorrow – and beyond.

Key Differentiators

Our People

- Our team is composed equally of fresh innovators and experienced leadership, delivering results from all angles
- We're a team of true believers - not only in our own core mission, but in our clients' missions as well
- We deploy the right resources for each project, balancing focus between domain knowledge and technical skill
- We provide access to skills training to all our employees and consultants to continually enhance technical and professional capabilities
- Our annual attrition rate is < 2%, proving that our people are the catalyst for our success

Our Experience

- We sponsor events such as Tech Talks and Hackathons to help expand industry knowledge
- Over 70% of our revenue is organic growth expanding from our existing work scope
- We achieved CMMI Dev-3 and ISO 9001:2015 certification in significantly less time than the industry average
- We consistently receive outstanding feedback on our work and have trusted relationships with all our clients

Our Culture

- We believe good ideas can come from anyone
- We give 5% of our yearly profit to local and global charities
- We support large scale systems with the agility and passion of a small business

Core Capabilities

Data Science, Management, and Analytics

Combined with our Infrastructure & Cloud Engineering services, Niyam's comprehensive data management package can be tailored to fit the needs of any organization.

- Extract maximum intelligence from your data with AI and Machine Learning-based data analytics
- Simplify structured and unstructured data using Natural Language Processing and custom algorithms
- Easily transform disparate high-volume data sources into timely insights with self-service data accessibility
- Deploy custom dashboards built to your specifications or integrate your favorite 3rd party visualization tools

GIS Analytics and Applications

Using advanced spatial modeling software and specialized tools and techniques, our GIS experts collect and analyze geospatial data to reveal accurate, mission-critical insights.

- Deploy spatial analytics to predict risk areas for emergency management (FEMA)
- Implement real-time situational awareness plans using Geocoding/Geolocation and remote sensing data
- Prepare for any scenario with custom risk assessments and mitigation/preparedness plans
- Get next-gen geospatial visualization and analytics support using ESRI ArcGIS and Open Source Software

Infrastructure and Cloud Engineering

Our experts help clients gain control over their toughest operational challenges by creating fit-for-purpose solutions that deliver rapid innovation capabilities.

- Optimize the allocation of resources with solutions tailored to your priorities and available infrastructure
- Deploy fit-for-purpose cloud applications and single- or multi-cloud deployment strategies
- Protect your data on-site or in the cloud and monitor the trust of all your digital interactions
- Our 99.99% uptime guarantee ensures maximum operational functionality and service reliability

Agile/DevSecOps

With our exclusive Responsive Methodology® process, clients see dramatically improved transparency, flexibility, and adaptability, while minimizing cost and risk – putting them on the road to faster, more agile innovation.

- Get your product out the door and into customers' hands faster, with fewer setbacks and lower risk
- Foster collaboration and transparency among teams by breaking down departmental barriers
- Eliminate operational chaos and proactively plan for change with flexible, scalable solutions
- Improve security posture and increase operational efficiency by automating security protocols

Robotic Process Automation

In contrast to traditional IT or business process management solutions, our RPA solutions allow organizations to automate at a fraction of the time and cost.

- Boost accuracy with targeted, rules-based automation
- Improve compliance and reduce operational risk with fully-monitored, reliable execution
- Leverage the power of RPA's parallel performance to scale up quickly with minimal costs
- Increase productivity and innovation by eliminating repetitive, non-value-add tasks
- Automate the processing of complex formats using machine learning and integrate with BI solutions
